Which Wellington Web Design Course?

Which Wellington web design course suits you? There's a range of great courses to choose from in Wellington. Whether you're looking for a degree course, a diploma course or a short course, there's at least one Wellington education provider that offers the course you are looking for to launch you into the world of web design, or sharpen your skills if you've already been in the web design field for a while

What do you need? Massey University and Victoria University of Wellington offer full degree courses with the opportunity to carry on to do postgraduate design qualifications, and Whitireia Polytechnic also offers a degree course. Yoobee School of Design offers diploma courses, while the Community Education Centre offers short basic courses that will get you underway in the field.

So which course suits you will depend on what you're looking for. Is it a deep dive into web design or a quick plunge? Are you more interested in a degree qualification that will look good on your CV, or in short, practically-focused courses? Each type of course has its advantages and disadvantages.

Specialties vary too. Is your main interest in visual design, interaction design, or user experience design? Web design is a complex and fast-changing field, and there is more than one way to approach it. Do you want to be a specialist, gaining expertise in one specific aspect of web design, or do you want to make sure that you have a breadth of knowledge of the field?

Whatever you're looking for, there is a Wellington web design course to meet your needs. More information about the five courses offered in Wellington can be found over the page.

Community Education Centre

The Community Education Centre's Web Design and Development course introduces students to basic HTML5 tags and structure, CSS, the structure and naming of folders, hyperlinks, images and code checking. The course is a mixture of theory and exercises.

By the end of the course, students will have planned, designed and coded a basic website which they can use as a template to create additional sites – and they'll understand how to organise web hosting and domains.

Massey University

Massey University's Bachelor of Design and Bachelor of Design with Honours in Visual Communication Design are four-year programmes that give students a thorough grounding in design theory and practice.

Students whose focus is digital media and interactivity learn about web and mobile media, animation and media production. They work on studio projects both individually and in groups. Students graduate ready for professional design practice and the industry, business, and marketing-related tasks that go with it.

Victoria University

The Web Design specialty in Victoria University's three-year Bachelor of Design Innovation in Interaction Design takes a collaborative and cross-disciplinary approach that helps students to discover how people experience apps and websites. Students will learn how to bring these experiences to life in exciting and effective ways.

This Interaction Design specialty is a great study option for students interested in improving the quality of the human experience in such areas as web and game design.

Whitireia Polytechnic

Whitireia Polytechnic's three-year Bachelor of Applied Arts (Visual Arts and Design) offers students the chance to specialise in visual communication design (publication design, motion graphics, photography, digital illustration and web interface design), and then to focus on one area of design.

The course has a strong practical focus. In their final year, students develop portfolios and approach a variety of design professionals to showcase their work - great preparation for becoming a web design professional.

Yoobee

The one-year full-time Diploma in Digital Design – Web and Graphic (Level 5) is a new and vital addition to the range of web design courses Yoobee offers.

Designed to meet the latest industry demands, this course will introduce students to all the major components of graphic design and web development. Students will learn how to use graphic design to produce websites, software, and user interfaces, working on in-depth projects that will go into their portfolio.
